github.com/priprince | <https://priprince.github.io/portfolio/> | Madurai TN, India

Professional Summary

Senior Flutter Developer with **4.5 years of specialized Flutter experience** and **5+ years in IT**, delivering 15+ production-grade mobile applications across healthcare, fintech, crypto, and media domains. **Expert in scalable cross-platform development (iOS, Android, Web)** using Clean Architecture, **BLoC and Riverpod**. Strong Full-Stack Mobile Engineer with hands-on experience in **Node.js, GraphQL, PostgreSQL, and AWS serverless architecture**. Proven technical lead with strengths in performance optimization, security-heavy applications, and AI-powered integrations.

Professional Experience

Senior Mobile Application Developer | Honerise Digital – Madurai, Tamil Nadu, India Nov 2022 – Present

- Led end-to-end development of Nudj Patient and Nudj Clinician apps (healthcare SaaS platform) serving patients and physicians across iOS, Android, Web, and Tablet, integrating **RPM devices, real-time health monitoring, encrypted data storage (HIPAA considerations), and community chat**.
- Architected secure Flutter applications using BLoC/GetX with biometrics, MFA, encrypted storage, and device integrity checks.
- **Architected clean architecture** with BLoC and GetX state management, implementing **jailbreak detection, screenshot prevention, biometric auth, magic link, and SMS MFA** for sensitive healthcare data protection.
- **Built Fpowrd music app from scratch** using Riverpod, integrating Google Drive, Dropbox, file system operations, and **Android Intents for cross-app audio streaming**. Collaborated with Rust audio tags library author to optimize performance.
- **Developed AI-powered Calorie App** using Gemini 4B parameters model for image recognition, researched ML solutions (YOLOv8, Roboflow), and provided **cost estimation, GPU requirements, and server load balancing roadmap** for production deployment.
- Built 100+ GraphQL and REST APIs using Node.js, PostgreSQL, and AWS Lambda (serverless).
- Improved performance using backend optimization and Dart Isolates.
- Led sprint planning, estimation, architecture decisions, and client communication for a 6-member team.
- Interviewed and mentored Flutter and Node.js engineers.

Mobile Application Developer | Fire Bee Techno Service – Madurai, Tamil Nadu, India Jan 2022 - Oct 2022

- **Developed blockchain-based cryptocurrency exchange apps** (Gio Exchange, Coinqueens, Futurex, Returex) from scratch using Flutter, GetX, and Hive, handling **real-time WebSocket data streams from Binance and WazirX APIs**.
- **Built secure peer-to-peer trading features** with real-time price updates, order management, and wallet integration for Bitcoin and altcoin trading platforms.
- **Awarded "Star Performer of the Year"** for consistently delivering client requirements on time and exceeding expectations.
- Led a team of 4 developers, conducting code reviews and ensuring adherence to clean code practices.

Flutter Developer | CVIAC – Madurai, Tamil Nadu, India Dec 2020 - Dec 2021

- Developed multiple production apps including Dustman Customer/Vendor (waste management), WeConnect (digital platform), and AmtechPe (fintech) using Flutter, GetX, Hive, and Isar DB.
- Integrated REST APIs, Firebase (FCM, Auth, Crashlytics), and managed both MongoDB and MySQL databases with Node.js backend.

Key Projects

Nudj Patient App | Nudj Clinician App | Fpowrd Music (Healthcare SaaS)

Nov 2022 – Present

Role: Senior Mobile Application Developer

Links: Patient([ios](#) | [Android](#)), Clinician([ios](#) | [Android](#))

Technologies: Flutter, Dart, Bloc, Node.js, Express.js, JWT, TypeScript, GraphQL, Hive, Just Audio, Audio Tags, Isolates

- Lifestyle monitoring app connecting patients with care managers, featuring **RPM device integration, health assessments with graphs, fitness tracking, recipe sections, and community chat.**
- Implemented **military-grade security:** encrypted Hive storage, jailbreak detection, real device verification, screenshot/screen recording prevention, biometric authentication, magic link, and password/SMS MFA flows.
- Integrated **deep linking, URL launcher for phone/SMS/email**, skeletonizer loading states, and AWS services (Amplify, S3, CloudWatch, Lambda).
- Physician-facing counterpart to Patient app with identical security and architecture complexity, enabling doctors to monitor patient health data, assessments, and communicate via secure channels.
- **Built from scratch with zero prior music app experience**, learning audio architecture and implementing multi-source audio import (Google Drive, Dropbox, file system).
- Leveraged **Android Intents to receive audio streams from email and other apps**, integrated Rust-based audio tags library after collaborating with author on LinkedIn.
- Used **Isolates for heavy audio processing** to maintain smooth UI performance. **Currently in internal testing, launching soon.**
- **Available on US App Store/Play Store** | Production users: Healthcare patients and care teams.

AI Calorie Recognition App | Cryptocurrency Exchange Apps

Feb 2023 – Present

Role: Lead App & Web Developer **Links:** Dustman([ios](#) | [Android](#)), Vendor([ios](#) | [Android](#)), VDigital([Android](#)), GioEx([Android](#))

Technologies: Flutter, Dart, Riverpod, Gemma3 AI, GPT-4 Vision Api, YoloV8, Roboflow, Binance/Wazirx websockets

- Researched and evaluated AI solutions including **Gemma 3 (4B parameters) for local image recognition, YOLOv8 for object counting, and Roboflow for custom model training.**
- Implemented **GPT-4 Vision API for nutritional analysis from food images** after hardware limitations prevented local model deployment.
- Delivered comprehensive **technical roadmap including model selection, cost estimation, GPU requirements, and server load balancing strategy** for production scaling.
- Developed **Gio Exchange , Coinqueens, Futurex, and Returex** from ground up, mastering **real-time WebSocket connections for live price feeds and order book updates.**

Technical Skills

Mobile Development: Flutter, Dart, Android, iOS

State Management: BLoC, Riverpod, GetX

Backend & APIs: Node.js, Express.js, GraphQL, Knex.js, WebSocket, TypeScript

Cloud & DevOps: Aws(Lambda, Cognito, S3, CloudFront, SNS, Serverless) **CI/CD** (Render, Vercel, Github Actions)

Databases: MySQL, PostgreSQL, Hive, Isar, Firebase

Payment Integration: Stripe, Square, Razorpay

Security : JWT, OAuth, MFA, Magic Link, Biometrics, App Links

Tools & IDEs: Git, GitHub, Android Studio, Xcode, VS Code, Postman, Playground

AI Integrations: GPT-4 Vision API, Gemini API, YOLOv8, Gemma3 4B parameters

Education

Infant Jesus College Of Engineering, B.E. in Aeronautical Engineering – Thoothukudi, TN, India

2011-2015

Languages

English: Professional proficiency | **Tamil:** Native proficiency | **Hindi:** Writing & Reading
