LinkedIn: linkedin.com/in/pravin-prince-a2826b254 | GitHub: github.com/priprince

PROFESSIONAL SUMMARY

Senior Flutter Developer with 4.5+ years of Flutter experience and 5 years in IT, delivering 15+ production-grade mobile applications across healthcare, fintech, crypto, and media domains. **Expert in scalable cross-platform development (iOS, Android, Web)** using Clean Architecture, **BLoC and Riverpod**. Strong Full-Stack Mobile Engineer with hands-on experience in **Node.js, GraphQL, PostgreSQL, and AWS serverless architecture**. Proven technical lead with strengths in performance optimization, security-heavy applications, and AI-powered integrations.

CORE TECHNICAL SKILLS

Mobile Development: Flutter (iOS, Android, Web)

State Management: BLoC, Riverpod, GetX

Architecture: Clean Architecture, MVVM, SOLID Principles

Backend: Node.js, Express, GraphQL, REST APIs, WebSockets

Databases: PostgreSQL, Hive, Isar, Firebase

Cloud & DevOps: AWS (Lambda, Cognito, S3, CloudFront), CI/CD (CodeMagic)

Security: JWT, OAuth, MFA, Biometrics, App links

AI Integrations: GPT-4 Vision API, Gemini API, YOLOv8

PROFESSIONAL EXPERIENCE

Senior Flutter Developer | HoneRise Digital Pvt Ltd (Nov 2022 – Present)

- Led end-to-end development of healthcare SaaS applications across iOS, Android, Web, and Tablet.
- Architected secure Flutter applications using BLoC/GetX with biometrics, MFA, encrypted storage, and device integrity checks.
- Built 100+ GraphQL and REST APIs using Node.js, PostgreSQL, and AWS Lambda (serverless).
- Improved performance using backend optimization and Dart Isolates.
- Led sprint planning, estimation, architecture decisions, and client communication for a 6-member team.
- Interviewed and mentored Flutter and Node.js engineers.

Flutter Developer | FireBee Techno Service Pvt Ltd (Jan 2022 – Oct 2022)

- Developed cryptocurrency exchange applications with real-time WebSocket data.
- Implemented P2P trading, wallet integration, and live order management.
- Led a 4-member team and received the Star Performer of the Year award.

Flutter Developer | CVIAC (Dec 2020 – Dec 2021)

- Built production Flutter apps across fintech, waste management, and digital services.
- Integrated REST APIs, Firebase services, and Node.js backends.
- Migrated state management to BLoC and Riverpod.

SELECTED KEY PROJECTS**Nudj Patient & Clinician Apps – Healthcare SaaS**

- RPM device integration, real-time monitoring, encrypted data storage.
- HIPAA-aligned security with biometrics and MFA.
- Flutter Web deployed on AWS S3 + CloudFront.

Fpowrd Music Streaming App

- Multi-source audio import (Google Drive, Dropbox, local files).
- Integrated Rust-based audio tag processing with Dart Isolates.

AI Calorie Recognition App

- Food image analysis using GPT-4 Vision API.
- Evaluated YOLOv8 and Gemma3 (4B parameter) models and delivered a production AI roadmap.

EDUCATION & CERTIFICATIONS**B.E. Aeronautical Engineering – Infant Jesus College of Engineering (2011–2015)**

AI Engineer Bootcamp – Udemy (2024)

Dart & Flutter Zero to Mastery + Clean Architecture – Udemy (2023)
